

How to conduct research studies in Projects?

- What kind of tools / methodology can be used to collect data ?
- How to bring together universes that are not used to cooperate (Research / Education / Business) and to have a common understanding of the Research expectations ?

WP5

INTERNATIONALISATION AND TRANSNATIONAL MOBILITY

TASKS

Blended mobility for learners

- 5.1 Development of blended training modules to be offered by schools
- 5.2 Creation of a catalogue of blended transnational training modules
- 5.3 Pilot blended mobilities among VET schools and HEI to test the training modules
- 5.4 Collection of evaluation from participants and schools
- 5.5 Fine tuning and finalisation of the catalogue of training modules

D5.1 BLENDED MOBILITY CATALOGUE FOR EXCHANGES AMONG SCHOOLS

Internationalisation course for staff

- 5.6 Collection and analysis of practices / materials on internationalisation in the teaching process
- 5.7 Development of the training course on internationalisation for teachers
- 5.8 Seminar on the internationalisation of VET
- 5.9 Testing of the training course on internationalisation for teachers
- 5.10 Collection of the feedback from participants and organisations
- 5.11 Fine tuning and finalisation of the online training course and mainstreaming

D5.2 TRAINING COURSE FOR SCHOOLS' STAFF ON INTERNATIONALISATION

Mobility for professionals

- 5.12 Definition of Learning Outcomes for professionals, on the basis of skill gaps analysis in WP3
- 5.13 Creation of learning mobility experiences for professionals
- 5.14 Testing of Learning mobility experiences for professionals
- 5.15 Collection of the feedback from participants and organisations
- 5.16 Fine tuning and finalisation of the mobility scheme for professionals + upload of the learning experiences on the catalogue

D5.3 MOBILITY SCHEME FOR UPSKILLING PROFESSIONALS IN ARTS & CRAFTS

BUILDING AN APPLIED RESEARCH FACILITY INTO

CoVE - European Platform for Urban Greening

EuropeanPlatform
UrbanGreening 

BARCOVE
BUILDING AN APPLIED RESEARCH FACILITY INTO

As a European Platform for Urban Greening we work on increasing the knowledge and skills needed to address biodiversity, climate adaptation and well-being in the urban green living environment, and broadening expertise among professionals in Europe.

Working fields: **biodiversity, climate adaptation and wellbeing of green**

BARCOVE develops an innovative and standard-setting model for school-company cooperation in vocational education and training. It focuses on applied research as a lever for scientific, technical innovation within urban space and water management.

Research fields in BARCOVE; **Permeable pavement, Soil and Plant Properties in Technical Sustainable Drainage Systems, Rainwater systems and Green roofs**

When BARCOVE reaches its end in December 2024, the project partners will have a number of completed and tested results

**WP2
2023**

**WP4
2024**

**WP5
2024**

**WP3
2023/
24**

- An overview of previous experiences with applied science and school-company collaboration in the blue-green sector as well as a number of good and/or interesting practices in the field (**WP2**)
- An innovative development process, where business partners and VET schools have jointly developed and tested a prototype of a collaboration, where VET students based on the companies' concrete and real innovation needs have provided a number of practical solutions that are ready for implementation in the companies (**WP3**)
- A Recipe Book that, based on the partnership's analyzes and practical experience, explains how applied science can be implemented in a fruitful interaction between companies, VET schools and HEIs. (**WP4**)
- Two courses, designed for business leaders and employees as well as for VET school leaders and educators, which in a condensed form give participants concrete knowledge about the application of applied research in school-business collaboration, including the societal background, the business economic basis, the pedagogical-didactic thinking as well as the practical approach to the organization of it. (**WP4**)
- A proven format for an annual event, i.e. a Future Festival that combines seminar presentations, exhibitions and student competitions. (**WP5**)

Concrete actions

1. Mapping of VET centres involved in AR in Europe and abroad.
2. Collection of case studies to explain, describe, evaluate, and understand different approaches to do AR in VET.
3. Analysis of AR activities in different policy contexts in Europe.
4. Identification of financial models of AR in VET.
5. Creation of a glossary to clarify the meaning of the term “applied research”, and other terms related to R&D, in the context of VET.
6. Report on main barriers and enablers to engage SMEs in AR in VET.
7. Development of tools for VET staff and teachers' mind-sets for AR.
8. Creation of a framework for building the capacity of VET systems to work on AR projects.

Rules of the Game

- You've been assigned a country (a partner on the MOSAIC project)
- You've been assigned a theme to work on
- You've been assigned a goal to achieve
- What methodolog(y)(ies) are you going to use to achieve your goal
- Use the material to brainstorm and document your thinking process
- At the end, you'll have two minutes to share your thoughts and decisions!

INTERESTING TO KNOW

- What process, methodology and tools do we use to work together, as we have such different profiles ;
- How to popularize Research for non-Researchers;
- How do we collect, analyze and share data ;
- The importance of the results and of the experience of learning from each other in a continuous process;
- Example of methodologies that we've used to collect data (Survey, Desk-research, Questionnaire, Focus Groups...)
- How to deal with Research with EU but also not EU partners ?
- Lessons learnt & Pitfalls to avoid
